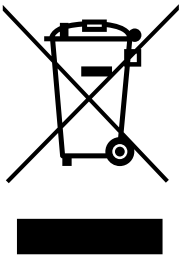
This document contains proprietary information protected by copyright. All rights are reserved. No part of this manual may be reproduced by any mechanical, electronic, or other means in any form without prior written permission of the manufacturer.

Disclaimer

The information in this document is subject to change without prior notice in order to improve reliability, design, and function and does not represent a commitment on the part of the manufacturer.

In no event will the manufacturer be liable for direct, indirect, special, incidental, or consequential damages arising out of the use or inability to use the product or documentation, even if advised of the possibility of such damages.

Environmental Responsibility



ADLINK is committed to fulfill its social responsibility to global environmental preservation through compliance with the European Union's Restriction of Hazardous Substances (RoHS) directive and Waste Electrical and Electronic Equipment (WEEE) directive. Environmental protection is a top priority for ADLINK. We have enforced measures to ensure that our products, manufacturing processes, components, and raw materials have as little impact on the environment as possible. When products are at their end of life, our customers are encouraged to dispose of them in accordance with the product disposal and/or recovery programs prescribed by their nation or company.

Battery Labels (for products with battery)

California Proposition 65 Warning

WARNING: This product can expose you to chemicals including acrylamide, arsenic, benzene, cadmium, Tris(1,3-dichloro-2-propyl) phosphate (TDCPP), 1,4-Dioxane, formaldehyde, lead, DEHP, styrene, DINP, BBP, PVC, and vinyl materials, which are known to the State of California to cause cancer, and acrylamide, benzene, cadmium, lead, mercury, phthalates, toluene, DEHP, DIDP, DnHP, DBP, BBP, PVC, and vinyl materials, which are known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

Trademarks

Product names mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective companies.

Conventions

Take note of the following conventions used throughout this manual to make sure that users perform certain tasks and instructions properly.

Additional information, aids, and tips that help users perform tasks.

Information to prevent ***minor*** physical injury, component damage, data loss, and/or program corruption when trying to complete a task.

Information to prevent ***serious*** physical injury, component damage, data loss, and/or program corruption when trying to complete a specific task.

1 Introduction

1.1 Overview

The EGX-MXM-T1000 embedded graphics module features the NVIDIA Quadro® T1000 GPU based on the advanced NVIDIA Turing™ TU117 architecture in MXM 3.1 Type A form factor. The EGX-MXM-T1000 brings a new level of performance to visual graphics and computing applications, fully integrating hardware acceleration for both graphics and computing code, enabling hardware acceleration for a wider class of software applications than ever before.

The EGX-MXM-T1000 supports operability in an extended temperature range of -40°C to 85°C, suitable for mission-critical harsh environments. With its 896 CUDA core Turing GPU, the EGX-MXM-T1000 supports 4 FHD displays, delivering the latest leading-edge GPU performance for your embedded system. Its superior graphics performance, GPU computing and video capabilities are the ideal solution for systems such as digital signage, medical image, defense and aerospace application.

1.2 Features

- MXM 3.1 Type A FF (82 x 70 mm)
- 896 CUDA cores
- 2.6 TFLOPS SP peak performance
- 4 GB GDDR6 memory
- 192 GB/s maximal memory bandwidth
- Support for up to 4 FHD displays, 50W TGP
- 5 year performance warranty
- NVIDIA Quadro T1000 GPU
  - Package 29 x 29 mm
  - Base Clock @1395 MHz
  - Boost Clock @1455 MHz

1.3 Specifications

1.3.1 Graphics Module

Graphics Core	
Architecture	NVIDIA® Turing™ TU117
GPU	Quadro® T1000
Display Outputs	4x DisplayPort 1.4 Max resolution 7680 x4320 @60Hz DSC MST: 1920x1080 for 4 ports
Signal Interface	MXM 3.1, PCI Express Gen3 x16 support
GPGPU Computing	
CUDA Support	896 CUDA cores, 2.6 TFLOPS SP Peak CUDA Toolkit 8.0, CUDA Compute version 6.1 OpenCL™ 1.2, DirectX® 12, OpenGL 4.5, Vulcan 1.0
Memory	
GDDR6 Memory	4GB @6Gbps
Configuration	256Mb x32
Bandwidth	128-bit 192 GB/s data rate x32 GDDR6 DRAM device data width
Physical	
Dimensions	82 (W) x 70 (D) x 4.8 (H) mm
Locking Mechanism	Standard MXM 3.1 Type A
Environmental	
Operating Temp.	Standard: 0 to 55˚C, Extended: -40˚C to 85˚C
Storage Temp.	-40˚C to 85˚C
Operating Systems	
Supported OS	Windows 10 & Linux Drivers, 64-bit

1.3.2 Display Support and Options

DisplayPort	▶ 1.2/1.3/1.4 ▶ Max. pixel clock: 1050 MP/s ▶ Max. bandwidth: 25.9 GB/s/connector
HDMI 2.0	Max. resolution: 4096 x 2160 at 60 Hz
HDCP Support	1.3 (DP), 2.2 (DP, HDMI)

1.3.3 Software Support

- CUDA Toolkit 8.0 and higher
- CUDA Compute version 6.1 and higher
- OpenCL™ 1.2
- DirectX® 12
- OpenGL 4.5
- Vulcan 1.0

1.3.4 Graphics Options

The EGX-MXM-T1000 supports 4xDisplayPort by default, with display options as shown below.

MXM port	DP_A	DP_B	DP_C	DP_D
NVIDIA Link	Link E	Link A	Link C	Link B

Table 1-1: Graphics Module Display Options

Link	**Display Type**
Link A	DisplayPort, DVI (Single Link or Dual Link with Link B)
Link B	DisplayPort, DVI (Dual Link with A)
Link C	DisplayPort, HDMI
Link D	Internal/ eDP only
Link E	DisplayPort, HDMI
Link F	DisplayPort

Table 1-3: MXM Connector Pin Definitions

1.7 Thermal Policy

The GPU core clock throttles at temperatures (T_J) past the thresholds shown with the behaviors as listed. Thermal throttling ensures that the highest temperature on the die does not exceed the sense temperature for prolonged periods of time.

Parameter	Value	Units
Thermal Resistance (Junction to Case, RJC)	0.039	°C/W
Thermal Resistance (Junction to PCB Board, RJB)	1.71	°C/W
GPU Maximum Operating Temperature1	89	°C
GPU Slowdown Temperature (THERM_ALERT)2	95	°C
GPU Shutdown Temperature (OVERT)3	100	°C

Table 1-4: Thermal Policy

NOTE:

- Max.GPU operating temperature is the maximum at which the GPU is guaranteed to operate at target performance (base clock) under total board power level
- THERM_ALERT generates a 50% (÷2) hardware clock slowdown.
- OVERT generates a 87.5% (÷8) hardware clock slowdown

1.8 Unpacking Checklist

Before unpacking, check the shipping carton for any damage. If the shipping carton and/or contents are damaged, inform your dealer immediately. Retain the shipping carton and packing materials for inspection. Obtain authorization from your dealer before returning any product to ADLINK. Ensure that the following items are included in the package.

- EGX-MXM-T1000 embedded graphics module

This page intentionally left blank.

2 System Requirements

2.1 Power Sequencing

For initial power on, or to Resume from S3 and S4, this sequence must be followed.

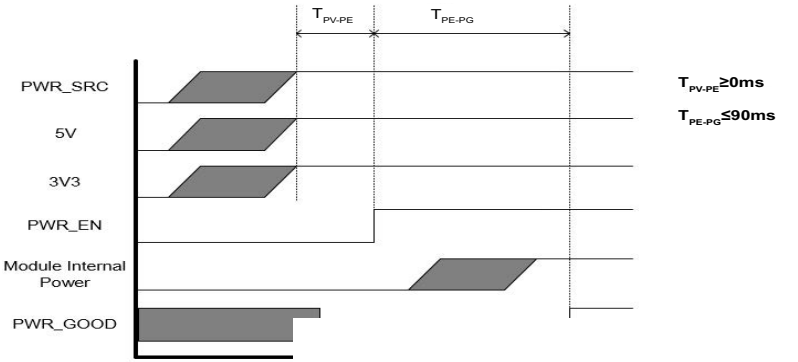

Figure 2-1: Power Sequencing

2.2 Module Power Up and Down

Issuing the PWR_EN signal powers the MXM module down, and the system designer can decide whether to keep the module input power when the MXM module is powered down.

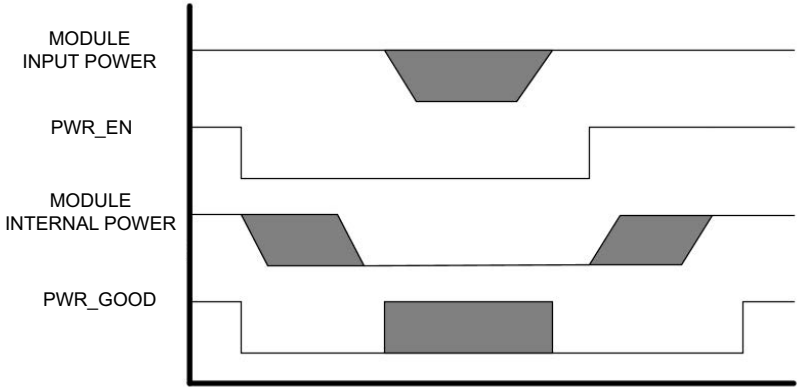

Figure 2-2: Module Power Down

2.3 Reset Requirements

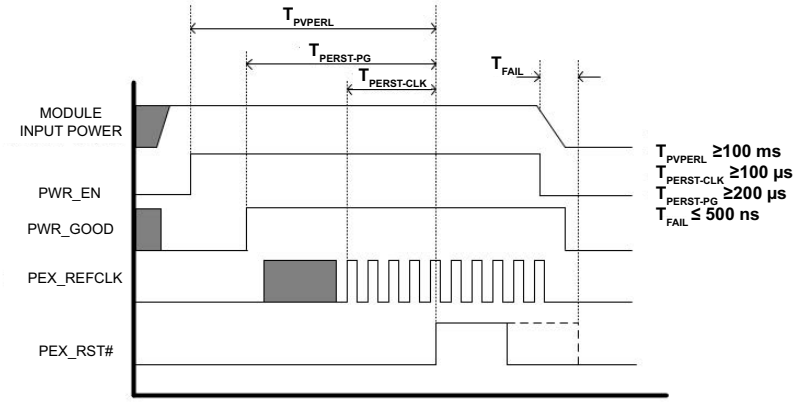

Figure 2-3: Reset Sequencing

2.4 Dual Mode DisplayPort Implementation

The EGX-MXM-T1000 supports four dual mode DisplayPorts by default. HDMI is supported via dongle (see “Display Support and Options” on page 3.). The system requires a switch circuit to determine whether the AUX or DDC signal is output from the MXM module, and AC coupling capacitors should be placed on the system board.

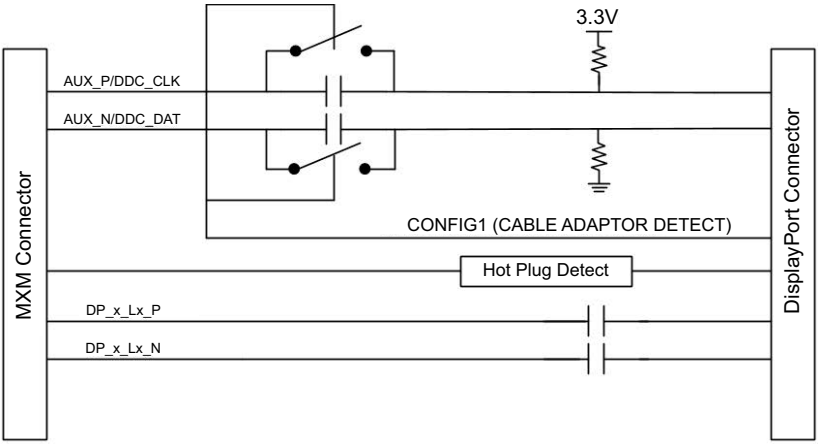

Figure 2-4: Dual Mode DisplayPort Implementation

2.5 DVI/HDMI on DisplayPort Interface

DVI and HDMI connectors can both be implemented through the DisplayPort interface. Circuits required on the system board are as shown. 499Ω with 1% pulldown resistors to the ground on the DP lanes must placed on the DVI/HDMI connector side of the AC coupling, gated by a MOSFET to limit leakage.

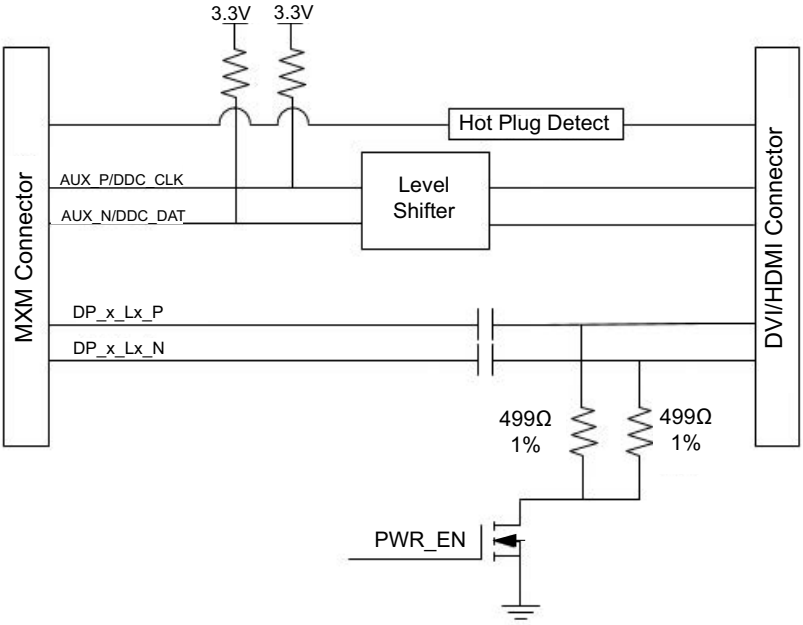

Figure 2-5: DVI/HDMI on DisplayPort Interface

2.6 Driver Installation

Drivers can be downloaded from https://www.adlinktech.com/Products/Embedded_Graphics/Embedded_MXM_Modules/EGX-MXM-T1000.

2.7 Certifications & Agencies

- Windows Hardware Quality Lab (WHQL) certified for Windows 10
- EU Reduction of Hazardous Substances (EU-RoHS)
- Conformité Européenne (CE)
- Federal Communications Commission (FCC)

This page intentionally left blank.

Important Safety Instructions

For user safety, please read and follow all instructions, Warnings, Cautions, and Notes marked in this manual and on the associated device before handling/operating the device, to avoid injury or damage.

S'il vous plaît prêter attention stricte à tous les avertissements et mises en garde figurant sur l'appareil , pour éviter des blessures ou des dommages.

- Read these safety instructions carefully
- Keep the User's Manual for future reference
- Read the Specifications section of this manual for detailed information on the recommended operating environment
- The device can be operated at an ambient temperature of 50ºC
- When installing/mounting or uninstalling/removing device; or when removal of a chassis cover is required for user servicing:
  - Turn off power and unplug any power cords/cables
  - Reinstall all chassis covers before restoring power
- To avoid electrical shock and/or damage to device:
  - Keep device away from water or liquid sources
  - Keep device away from high heat or humidity
  - Keep device properly ventilated (do not block or cover-ventilation openings)
  - Always use recommended voltage and power source settings
  - Always install and operate device near an easily accessible electrical outlet
  - Secure the power cord (do not place any object on/over the power cord)
  - Only install/attach and operate device on stable surfaces and/or recommended mountings
- If the device will not be used for long periods of time, turn off and unplug from its power source

- Never attempt to repair the device, which should only be serviced by qualified technical personnel using suitable tools
- The device must be serviced by authorized technicians when:
  - The power cord or plug is damaged
  - Liquid has entered the device interior
  - The device has been exposed to high humidity and/or moisture
  - The device is not functioning or does not function according to the User's Manual
  - The device has been dropped and/or damaged and/or shows obvious signs of breakage
- Disconnect the power supply cord before loosening the thumbscrews and always fasten the thumbscrews with a screwdriver before starting the system up
- It is recommended that the device be installed only in a server room or computer room where access is:
  - Restricted to qualified service personnel or users familiar with restrictions applied to the location, reasons therefor, and any precautions required
  - Only afforded by the use of a tool or lock and key, or other means of security, and controlled by the authority responsible for the location.

	**BURN HAZARD** Touching this surface could result in bodily injury. To reduce risk, allow the surface to cool before touching. ***RISQUE DE BRÛLURES*** *Ne touchez pas cette surface, cela pourrait entraîner des blessures.* *Pour éviter tout danger, laissez la surface refroidir avant de la toucher.*
